Minimal context switch

Work in progress Easy embedding

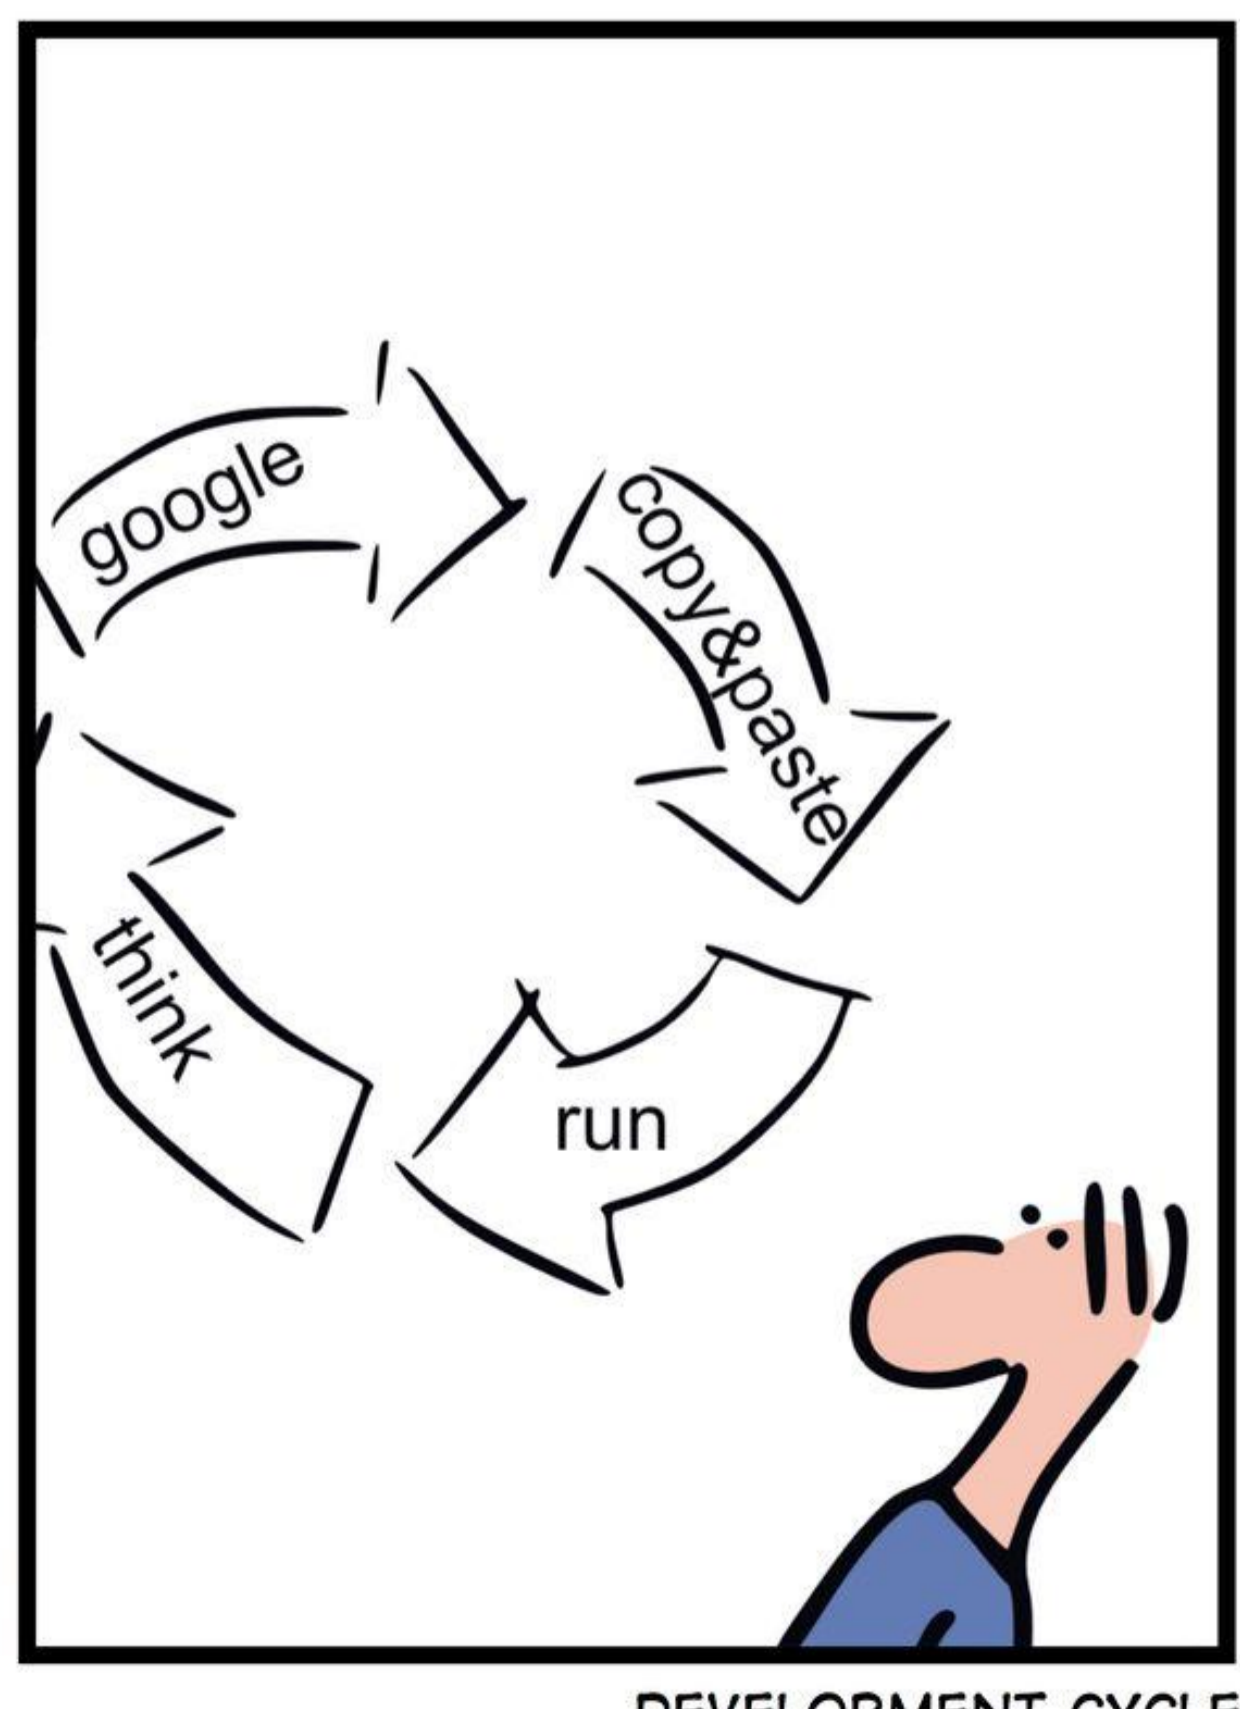

Work in progress Run code

```

[jquery, autocomplete] jquery autocomplete not working
$("#seed_one").autocomplete(data);

[jquery, autocomplete, jquery-autocomplete] jquery autocomplete customization
.data("autocomplete")._renderItem = function(ul, item) {
  var v = item.value;
  return $("- <li>

```

Example Overflow enables crowd-sourced software development by utilizing both textual and social information, which accompany source code on the Web. Its browsing mechanism minimizes the context switch associated with other code search tools.
